

Car Accessories for Hire

Detailed Information Sheet

Portable DVD Player

With a 7" fully rotatable screen, enjoy your movies, music and more anytime, anywhere.

Features:

- 7" LCD rotatable screen
- 3 hour battery life (comes with a 12V car charger as well)
- Built-in stereo speaker (with a headphone jack)
- Composite video input/out
- Anti-shock protection
- Subtitle support
- Parental control

Supported formats:

- DVD-Video (region 4), Audio CD, Kodak Picture CD, DivX

Package includes:

- Portable DVD player
- Carry bag
- Straps for the front passenger headrest, allowing rear seat passengers to use the DVD player hands free
- Rechargeable battery pack
- User's manual
- Power supply cord with A/C adapter
- 12V car charger
- A/V cables

240V A/C Inverter

A 12V DC to AC power inverter converts DC current into conventional AC electricity which can run all kinds of household products such as small kitchen appliances, 34cm TV's, radios, laptop computers, recharging power tools or batteries, lamps and fluorescents up to 300W, and more. Simply connect the power inverter to a 12V cigarette lighter socket and plug your AC devices into the power inverter.

Features:

- Powered by 12V car cigarette lighter with a 15A 3AG fuse
- 300 watts of continuous power, with surge currents up to 1000 watts
- Output is a standard Australian 3-pin mains socket

Please ensure your cigarette lighter circuit can supply more than 15A (most modern cars will be able to)

Portable Handheld Radios

Don't want to pay for expensive mobile calls whilst in close proximity? Use these great handheld radios for your next multivehicle road trip!

Features:

- Digital Coded Squelch (DCS)
- Extreme Distance Booster
- Range Extender (Duplex) Capability
- Backlit LCD Display
- Auto Battery Save
- Busy Channel Lockout Function
- Battery Level Indicator
- Monitor
- Built-in Headset Jack

(Image not representative of actual radios)

Package includes:

- 2x UHF handheld radios
- 8x AAA NiMH rechargeable batteries
- Battery recharger

MP3 Player FM Transmitter

What do you do if you want to listen to your MP3 player in the car? You certainly don't pop on your headphones (that's illegal), and affixing a set of portable speakers to your dash is a little clunky. Luckily, there's another solution. As long as you have a working FM radio, you can use an FM transmitter to listen to your MP3 player over your car stereo.

Features:

- Powered by 12V car cigarette lighter
- Built-in SD Card reader (for playing MP3 files directly from SD cards) and USB port (for USB jump drives, card readers etc)
- Line-In port allows you to use anything with a 3.5mm audio jack as an input source (including iPods, laptops etc.)
- Backlighted high resolution dot matrix LCD graphical display (shows icons and song names)
- Fast start up time (~2 seconds)
- Song memory - returns to the previous song after power on/off cycle

Package includes:

- FM transmitter
- 3.5mm audio line-in cable

Cigarette Adapter (2-in-1)

Having trouble powering all of those 12V cigarette lighter adapter cables in your vehicle?

Here's the solution - this little double adapter connects into a female cigarette lighter adapter and splits to two separate female adapters.

International Travel Power Adapter

Whether you are traveling from Europe, Africa, or Asia, this light-weight international travel power adapter is the ideal companion to ensure that you will be able to use your portable devices anywhere you go in Australia.

Important: Ensure that your device can switch to 240V.
This is not a step-up transformer – it is merely an adapter.

Window Sun Shades

If you're renting a car in Australia for long trips in the summer, you'll soon realise the burning sensation against your thighs and arms.

This is generally closely followed by:
"I should have done something about it!"

Well here's the cheap and easy solution - sun glare and heat protection for all your car windows that will pop up and open when you need it and folds down and away when you don't.
